EXPIRY STATUS		SOLIDS CONTENT	HS CODE
approx. 7.2 t good to 12/2026 · rest expired 02/2025, retest advised		**approx. 60 %** *(spec 59–61 %)*	**3905 21** *(indicative)*

The product

An aqueous vinyl acetate–ethylene copolymer dispersion, stabilised with polyvinyl alcohol and surfactants. Soft, low-temperature film former with high filler tolerance.

Adhesives-grade raw material in 1,100 kg IBCs, stored indoors in Germany. Most of the volume is past its shelf-life date; approx. 7.2 t is in date until December 2026.

Tufted carpet backings
Tuft anchorage and backing compound.

Packaging adhesives
Foamable packaging adhesives.

Filled adhesives
Binder for highly filled compounds.

Quality characteristics

Solids content	60.0–60.1 % (59–61 %)	CoA
pH (neat)	5.0 (4.0–6.0)	CoA
Viscosity, Brookfield	510–620 mPa·s (400–1,500)	CoA
MFFT	approx. 0 °C	TDS
Tg	approx. 10 °C	TDS
Appearance	White liquid	SDS

Specification in brackets. CoA for the in-date portion on request.

Key features

- Large volume of one grade, split by IBC
- Approx. 7.2 t still within shelf life
- High filler tolerance
- Non-hazardous; ships as general cargo

Documentation at hand

Certificates of Analysis	**Available**
Technical Data Sheet	**Available**
Safety Data Sheet	**Available**
Product photos	**Available**

Transport (ADR)

- Not dangerous goods; no UN number.
- Store at 5–35 °C, no frost or direct sun.
- Filter or sieve before use (skins may form).

Licences & compliance

- Not hazardous under CLP; EUH208 for trace biocide.
- Polymer, exempt from REACH registration.
- Not dual-use or a precursor; no licence needed.
